

# PORT OF VANCOUVER CENTERM TERMINAL

**CONTAINER SHIPPING LINES**  
calling the port

COSCO, HYUNDAI, NYK, OOCL,  
AND WESTWOOD

**900,000  
TEUs/YEAR**  
THROUGHPUT CAPACITY

ANNOUNCED  
EXPANSION TO  
**1.5M  
TEUs**

A western gateway and the largest port in Canada, Port Metro Vancouver requires inland connections that keep up with demand. That's where CN comes in.

CN works with Centerm, operated by DP World Vancouver, one of three primary container terminals located inside the Vancouver Asia-Pacific Gateway.

At 900,000 TEU capacity, it's a well-established terminal. The Centerm Expansion Project will increase the container capacity of Centerm, reducing existing road and rail congestion, bringing the total TEU capacity to 1.5 million.

With six deep sea berths, a 16-hour gate and sophisticated on-dock reefer systems, Centerm is optimal for safe

and efficient handling of cargo. Then once the cargo is transferred to rail, CN takes that care one step further, providing access to a 20,000 mile three coast network.

Long-term labor agreements are in place until 2018.
