

Picking Up Empties from Storage

CN stores empty containers and trailers in its terminals. Access to these empties will be through the *Speed Gate*.

- At the conclusion of the ingate process, *Speed Gate* prompts drivers to advise whether they are picking up equipment from the terminal.
- Guided by the gatestand prompts, the driver inputs an empty order/booking number or the initials and number of the empty to be picked up.
- The *Speed Gate* ensures the driver is eligible to pick up that unit.
- The gatestand will print a transaction ticket for the driver.
