Update on Western Canadian Grain – Crop Year 2025-26 Week 40

Summary:
In grain shipment week 40, CN transported nearly 730,000 metric tonnes of grain and processed grain products. This represents a 34% increase compared to the three-year average and very near supply chain targets. Although a brief network disruption on CN's Fraser subdivision adversely impacted traffic movements in and out of Prince Rupert Grain terminal at the beginning of the week, grain supply chain operations remained largely fluid throughout the week.

CN Maximum Sustainable End-to-End Supply Chain Capacity Guidance
The capacity of Canada's grain supply chain varies through the crop year, and multiple factors place a real limit on the volume of grain that can move through the system at any point in time. The maximum sustainable capacity of the grain supply chain is also a function of the capacity and operational efficiency of the individual pieces of that supply chain, from origin to destination.

It is CN's view that on a sustained basis, the end-to-end grain supply chain can accommodate up to 7,800 cars (or up to 744,000 metric tonnes) per week of bulk grain and processed grain products outside of winter, of which approximately 900 cars per week are anticipated to be shipments of processed grain products. These maximum end-to-end grain supply chain capacity levels on CN assume that multiple conditions must be in place to achieve these levels. These conditions include, but are not limited to, those noted in the chart below:

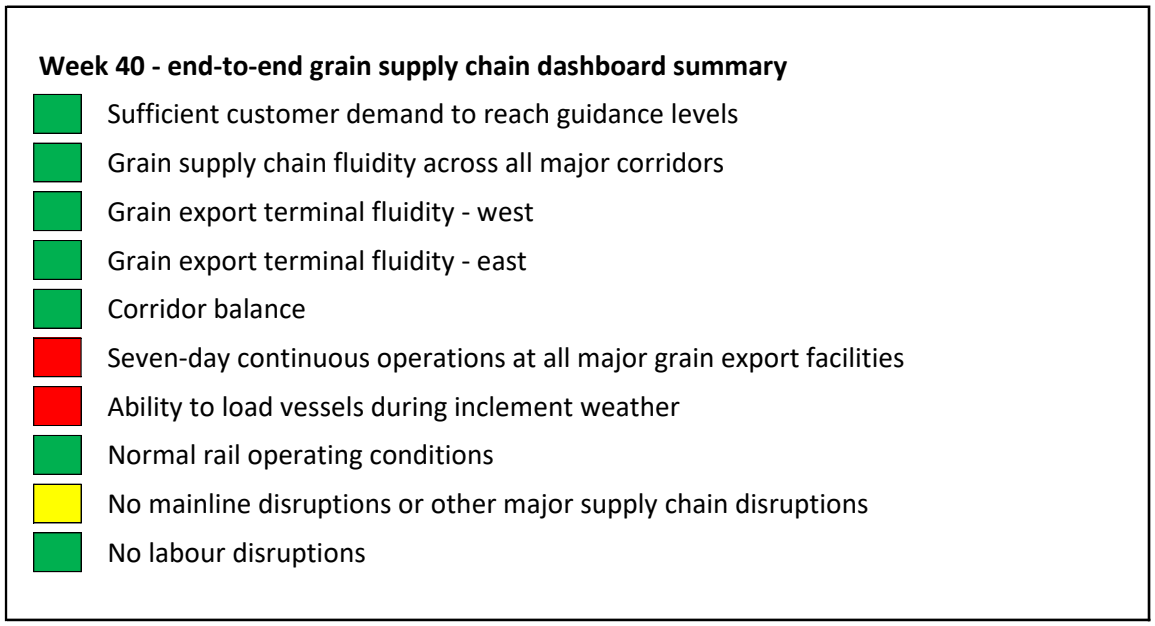

Figure 1. Weekly dashboard – conditions required to achieve maximum sustainable capacity guidance

Continuous operations at all grain export facilities:

- Prince Rupert Grain terminal does not operate 24/7

Vessel loading during inclement weather:

- Limited vessel loading during rain

No mainline disruptions or other major supply chain disruptions:

- Network disruption on CN's Fraser subdivision resulted in out of car time at Prince Rupert Grain terminal

Bulk grain movement:

For grain shipment week 40, CN shipped 6,385 bulk hopper cars, achieving 93% of the maximum sustainable supply chain capacity guidance of 6,900 bulk hopper cars.

Bulk grain hopper car demand detail - week 40	
Net demand for CN-supplied/private hopper cars	6,175
Maximum capacity	6,900
Planned movement	6,175
as % of maximum capacity	89%
Hopper cars shipped in the want week	6,385
as % of maximum capacity	93%

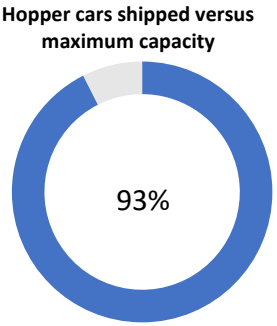

Figure 2. Bulk grain hopper car demand and demand fulfillment

CROP YEAR-TO-DATE SUMMARIES

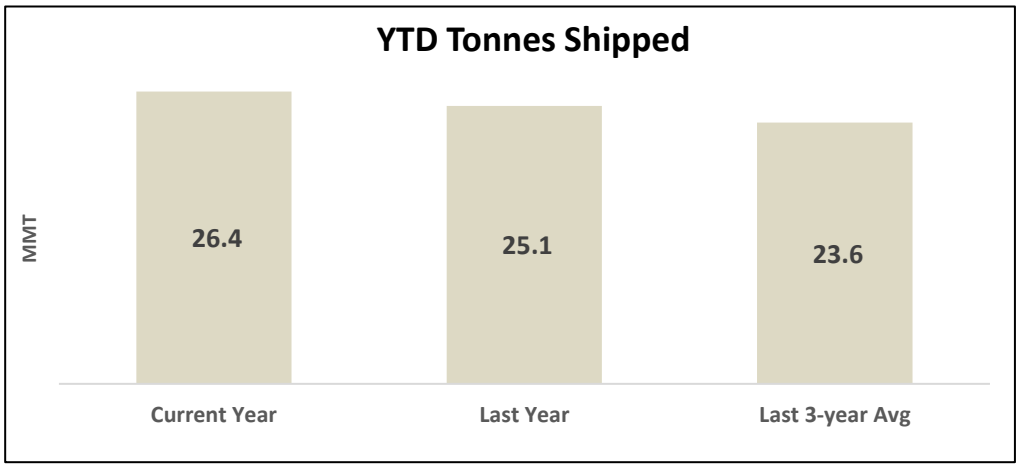

Figure 3. Crop year-to-date shipments of grain and processed grain products from western Canada

CN moved 26.4 MMT of western Canadian bulk grain through week 40 of Crop Year 2025-26. This tonnage is 12% above the prior three-year average, and 5% above last year.

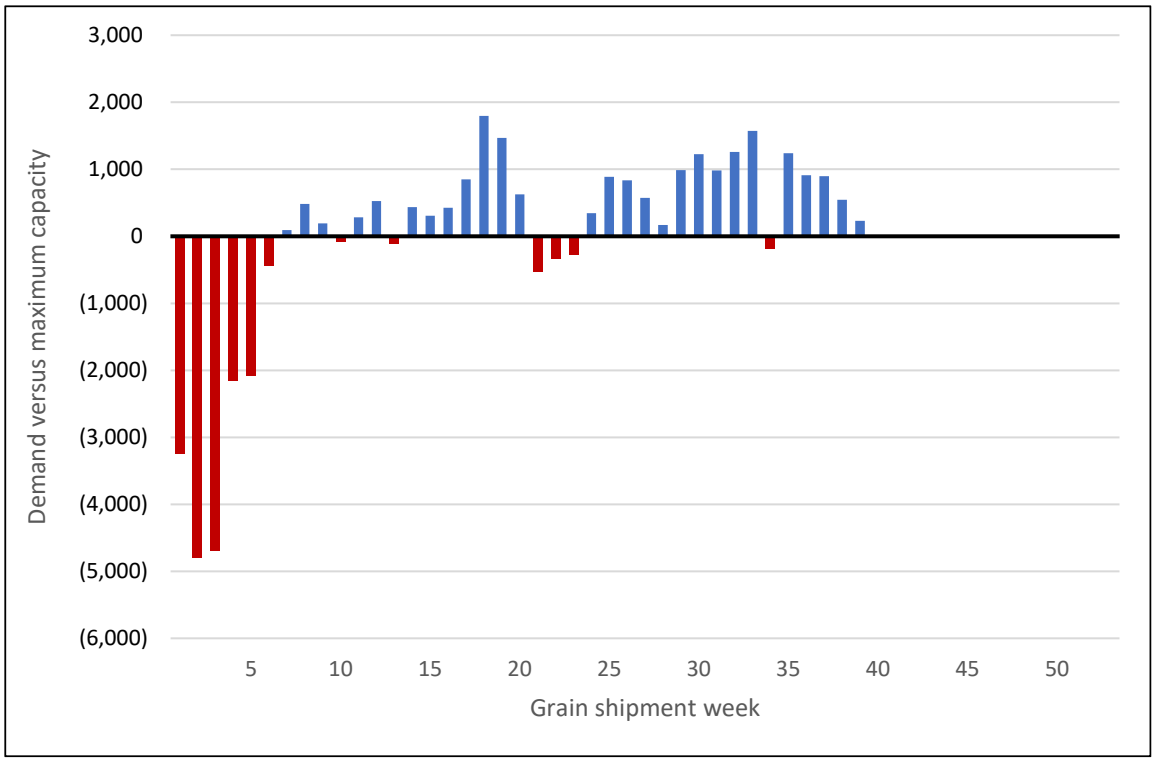

Figure 4. Customer demand for bulk grain movement via hopper car in relation to maximum end-to-end sustainable supply chain capacity on CN for bulk grain movement

Strong customer demand has entirely offset the unused grain movement capacity during the first six weeks of the crop year.

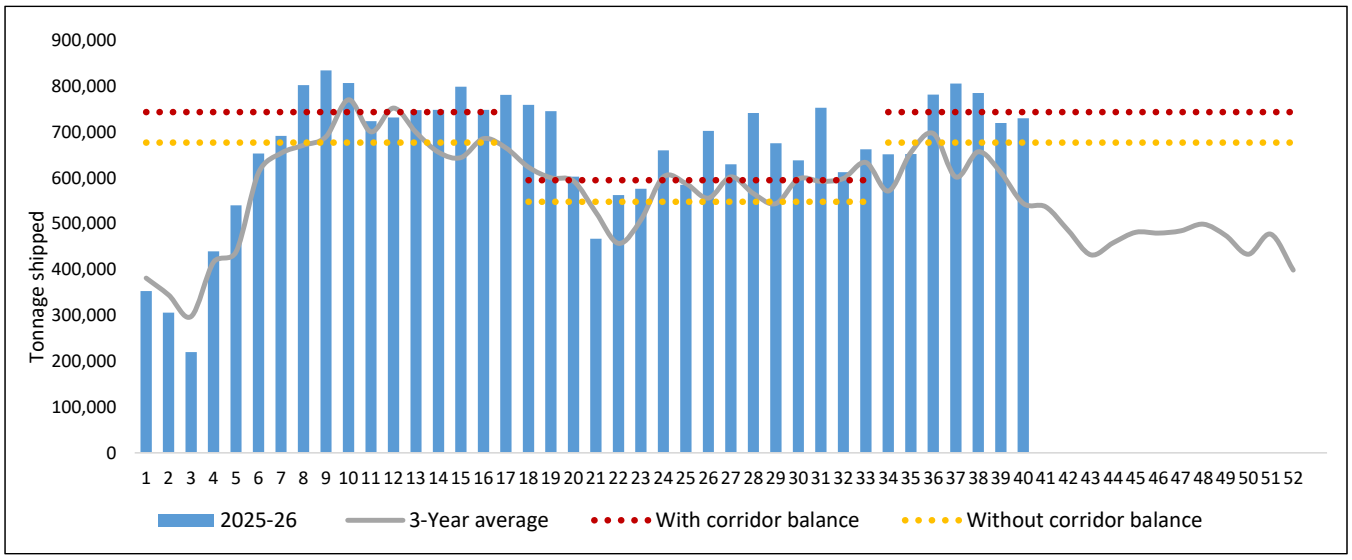

Figure 5. Weekly shipments of grain and processed grain products from western Canada on CN versus maximum end-to-end sustainable supply chain capacity guidance

GRAIN SHIPMENT WEEK 40 – SHIPMENTS OF GRAIN AND PROCESSED GRAIN PRODUCTS

Week 40 (metric tonnes)	Vancouver	Prince Rupert	Thunder Bay	Churchill	N. America Domestic	Total	Carloads
All Grain Supply Chains	370,819	101,234	89,439	0	168,600	**730,092**	**7,647**
YTD Shipments *(million metric tonnes)*							
Common Hopper Fleet	10.1	4.3	2.6	0.0	1.8	**18.7**	**194,166**
Customer-supplied equipment [1]	4.6	0.1	0.1	0.0	2.9	**7.7**	**80,331**
Total[2,3]	**14.7**	**4.4**	**2.7**	**0.0**	**4.7**	**26.4**	**274,497**

[1] includes bulk and processed grain moving in hopper cars and vegetable oil moving in tank cars

[2] Totals above exclude bulk or processed grain shipped in intermodal containers

[3] Totals may not add up due to rounding

COMMON CN-SUPPLIED HOPPER FLEET DETAIL

A. Car Demand and Order Planning

- Week 40 net car orders were 4,954. Changes to grain shipment demand in week 40 included:
    - Zero orders rationed
    - 549 orders cancelled throughout week 40

	Common Hopper Fleet	Week 40 Complete (May 03 to May 09) Vancouver	Prince Rupert	Thunder Bay	Churchill	N. America Domestic	Totals	Week 41 Latest	Week 42 Preliminary
Demand	Total Customer Orders	2,848	1,229	991	0	435	**5,503**	**5,196** (2)	**4,970** (2)
	Invalid Customer Orders	0	0	0	0	0	**0**		
	Terminal Authorized Orders(1)	2,848	1,229	991	0	435	**5,503** (1)		
	Cancelled Orders	(407)	(112)	(10)	0	(20)	**(549)**		
	Total Net Orders	2,187	1,061	653	0	696	**4,954**		
	Contracted Orders						**4,347**		
	Spot Orders						**607**		
Planning	Net Planned Orders	2,441	1,117	981	0	415	**4,954**		
	Planned Contracted Orders						**4,347**		
	Planned Spot Orders						**607**		
	% of Net Orders that were Planned						***100%***		

Note:

(1) New customer requests vetted for validity as per grain car ordering rules in CN Tariff 9000

(2) Number of cars requested before order cut-off time for want week - yet to be reviewed for validity

Figure 7. Summary of customer orders for CN-supplied hopper cars

B. Car Spotting Performance

- 5,509 empty cars spotted in week 40
- 91% spotting performance against the current week's plan
- 99.7% of planned orders were spotted in the want week or within 24-72 hours of the end of the want week

Year 2025-26 Week 40 Spotting Performance	**Spot Plan**			**Cars Spotted**			**Spotting Performance**	**Unfilled orders rolled to next week**
	Planned	**Cancelled**	**Net Plan**	**Last Week**	**Current Week**	**Total Spotted**		
Current Week Plan Authorized New Orders	5,503	(549)	**4,954**	0	4,500	**4,500**	91%	**454**
Prior Week's Orders (rolled forward to current week)	846	(8)	**838**	-	838	**838**	100%	**0**
"Add-in" Cars Ordered after weekly plan is set	-	-	**-**	-	31	**31**
