TOP THREE COMMODITIES

Intermodal

Coal

Forest Products

The bustling ports of Vancouver and Prince Rupert are dynamic gateways to international trade, offering shorter transit times to Asia. At the Port of Vancouver, we have coal, grain and container terminals. In the Vancouver area, where over 900 CN employees live and work, we have a distribution centre for forest products, two for metals, three for automotive products, and a CN CargoFlo® bulk handling centre. In Prince George, with over 600 employees, we have an intermodal terminal, a distribution centre for forest products and repair shops for locomotives and railcars. Surrey is home to Thornton Yard, Vancouver Intermodal Terminal and repair shops.

Network Investments

CN is moving significant volumes of steelmaking coal from Elk Valley Resources' four mines near Kamloops for export to Asia via the Port of Vancouver. CN invested over \$150 million to strengthen its rail network between Kamloops and Vancouver to handle the heavier traffic.

Over the past decade, CN has invested more than \$4.5 billion to build and maintain a safe and efficient network in B.C. and to support our supply chain partners. Expansion projects included the construction of new and extended sidings as well as double-tracking sections of our main lines to the ports of Prince Rupert and Vancouver. We have also undertaken a multi-year track rehabilitation program to support growing business in northeastern B.C. Maintenance projects focused on the replacement of rail and ties, plus upkeep of crossings, bridges, culverts, signals, and other track infrastructure.

CN is heavily involved in the safety of the communities along our network. A good example is the annual emergency response exercise undertaken by CN's Environment group in B.C. The exercise engages surrounding community stakeholders, including fire and rescue personnel from local towns and First Nations. Last year's exercise took place in Smithers.

Community Investments

In 2024, CN contributed to many B.C.-based organizations, including:

B.C. WILDLIFE FEDERATION CN supported the BCWF's Water, Water, Everywhere: Swan Lake Wetland Restoration project to restore 0.65 hectares of wetland habitat near Vernon, including replanting native species, removing invasives, and monitoring the site's progress for at least two years.

SPIRIT OF THE NORTH HEALTHCARE FOUNDATION CN sponsored the annual Spirit Day Radiothon, which raised a record \$382,652 in just 12 hours. The funds are being used to renovate and acquire furniture and beds for youth mental health as well as a cataract machine, cardiac remote monitoring kiosks, breast cancer detection software and numerous lymphedema garments for patients in the North.

SKILLS CANADA BC ASSOCIATION To help meet the future needs of industry, Skills Canada BC equips young students with the skills that will help Canada compete successfully in a rapidly changing world market. CN was an elite sponsor.

KINGDOM ACTS FOUNDATION CN's funding has helped Kingdom Acts Foundation expand its Food Security Program by increasing monthly food distributions, improving storage facilities and extending their educational outreach through more frequent cooking classes and community gardening projects.

FIRST NATIONS' EMERGENCY SERVICES SOCIETY With its roots going back nearly 40 years, FNESS serves First Nations in developing and sustaining safer and healthier communities through emergency planning, training, education, response, recovery and prevention. CN contributed to the acquisition of a fire services trailer.

TREE CANADA CN partnered with Tree Canada to plant almost 41,000 trees across British Columbia. These trees helped re-establish urban and rural forests, green communities, and recover areas with substantial tree loss to grow a greener future.
