

# **Implementation Guide to Carta Porte regulations**

**EDI 404**

**Version 8030**

# **Overview**

## **What are Carta Porte regulations?**

Carta Porte (Bill of Lading in Spanish) has been mandated by the Mexican government Tax Administration Service (SAT by its Spanish acronym) to be applied to all importation and exportation of goods in transit within Mexican territory. The Mexican government is looking to have information in advance of all goods in transit by any means of transport (air, sea, train, road, and others) throughout the Mexican territory.

## **What information is required?**

The Mexican government will request information including, but not limited to:

- Goods that will be moved throughout the Mexican territory.
- Shipper/Receiver information
- Specific information about the shipper and receiver locations

## **Responsibilities for the Shipper**

It is the Shipper's responsibility to provide the newly required Carte Porte information on the waybill via EDI 404 or website portal to the origin linehaul carrier. Noncompliance of the Carta Porte may result in clearance or interchange delays, fines, or confiscation of your shipment by the Mexican government.

## **CN Contact**

The **EDI Onboarding team** email address is EDIMGR@cn.ca. You can also visit us at [www.cn.ca](http://www.cn.ca).

.

## **What are the required changes?**

The following additional information **must be provided** to produce the Carta Porte:

1. The UNSPSC (United Nations Standard Practices and Service Code) Commodity Code from the SAT catalogue.
2. The Importer name, address, city, province/state, country code.
3. The Federal Taxpayer's Identification number.
4. The Mexican Tariff Rate Code
5. The Mexico Unit Packaging Code
6. The UN/NA Identification Code for dangerous goods/hazardous materials
7. The Mexico Hazardous Packaging Code
8. The Mexico Material Type Code
9. The complete commodity description – quantity, SAT commodity descriptions, weight unit measure, weight, and package type
10. The Shipper's 24-hour contact information
11. Universal Unique Identifier for transborder shipments originating in Mexico.
12. The ISO country code is also required when the ultimate origin country is outside of North America. When used for this purpose, it must contain the ISO-3166 Alpha-3 country code identification.

## **What shipment types require Carta Porte information?**

- Loaded cars moving within Mexico.
- Revenue empties
- Previously loaded with dangerous goods/hazardous materials residue empty
- New rail car from the assembly facility to destination when the car itself is the product.

## **What shipment types do NOT require Carta Porte information?**

- Non-revenue empty return (railcars previously loaded)
- Non-revenue loads of shipping devices or dunnage (applies to 4211299 only which are auto racks)

**The following segments on the EDI 404 will need to be mapped specifically to indicate Carta Porte**

- The UNSPSC Commodity Code per the SAT catalogue  
REF segment within the N7/REF Loop  
REF\*UNC
- Federal Taxpayer's Identification Number  
REF segment within the N1 Loop  
REF\*TJ
- Customs Tariff Code (Mexican Tariff Rate Code)  
N9 segment within the N7/REF Loop  
N9\*MTC
- Mexico Unit Packaging Code  
N9 segment within the N7/REF Loop  
N9\*MPC
- UN/NA Identification Code  
Identification Code for dangerous goods/hazardous materials  
N9 segment within the N7/REF Loop  
N9\*MHC
- Mexico Hazardous Packaging Code  
N9 segment within the N7/REF Loop  
N9\*MHP
- The Mexico Material Type Code  
N9 segment within the N7/REF Loop  
N9\*MMT
- N1 segment for the Importer  
N1\*IM
- N10 segment within the N7/REF Loop  
Commodity description, package type & quantity for each product in the shipment  
\*\*at least one instance of this segment is required with segment REF\*UNC
- Special Program Contact  
PER segment on the Shipper's N1 Loop  
PER01 of SP (shipper's contact name)  
PER03 of TE (PER04 is the 24-hour phone number for the contact identified as the shipper contact)  
PER05 of EM (PER06 is the email address of the contact identified in the Shipper contact)
- Universal Unique Identifier  
N9\*UUI  
\*\*required on all shipments shipped under an A1 Pedimento type **with a rail origin within Mexico** to a destination outside of Mexico.
- ISO Country Code  
The three-digit country code is also required **when the origin country of the goods is outside of North America** (Canada, United States, or Mexico). When used for this purpose it must contain the ISO-3166 Alpha-3 country code identification rather than the two-digit country code.

## Canadian National Railway - Electronic Commerce Carta Porte EDI 404 (Rail Bill of Lading) Requirements

CN recommends EDI shippers to be within 2 versions of the current EDI Standard X12 Standard  
Version/Release 8030/RAIL

Sample EDI Transmission with required data for the 404 Transaction Set on Carta Porte traffic of MALT  
from a Canadian origin to a Mexican destination.
